

TABLE OF CONTENTS

EXECUTIVE SUMMARY

1	INTRODUCTION.....	1-1
1.1	Objectives of the Feasibility Study	1-1
1.2	Work Plan.....	1-1
1.3	Background on the Study Area.....	1-3
1.4	Purpose and Contents of the Report	1-9
1.5	Acknowledgements	1-9
2	SUMMARY OF PREVIOUS STUDIES AND CURRENT PROGRAMS	2-1
2.1	General	2-1
2.2	Previous Studies.....	2-1
2.3	Current Programs	2-2
3	EXISTING NORTHERN GOVERNORATES WATER SYSTEM	3-1
3.1	General	3-1
3.2	Historical Development and Current Status.....	3-1
3.3	Existing Transmission Systems and Networks.....	3-3
3.4	Analysis of GIS database.....	3-7
3.5	Modeling of the Existing Transmission System	3-19
3.5.1	Data Preparation and Conversion to H2OMap.....	3-24
3.5.2	Connect the System Facilities	3-24
3.5.3	Assign Rationing Data	3-24
3.5.4	Assign Scenarios	3-24
3.5.5	Run and Debug the Model	3-24
3.5.6	Results and Analysis	3-25
3.6	Evaluation of Rehabilitation of Existing Facilities	3-25
4	POPULATION AND WATER DEMAND FORECASTS	4-1
4.1	General	4-1
4.2	Population Forecast	4-1
4.3	Water Demand Forecast.....	4-5
4.4	Municipal Wastewater Forecast.....	4-8
4.4.1	General	4-8
4.4.2	Wastewater Generation.....	4-8
4.4.3	Wastewater Treatment and Collection	4-8
4.4.4	Impact of Untreated Wastewater.....	4-9
4.4.5	Reclaimed Wastewater Reuse	4-10
5	EXISTING AND POTENTIAL WATER SUPPLY SOURCES.....	5-1
5.1	Introduction	5-1
5.2	Major Aquifer Systems in Northern Jordan.....	5-1
5.2.1	Upper Aquifer System (Quaternary – Tertiary Aquifers)	5-2
5.2.2	Middle Aquifer System (Tertiary – Cretaceous Aquifers)	5-5
5.2.3	Lower Aquifer System (Cretaceous – Jurassic And Paleozoic Aquifers)	5-7
5.3	Major Groundwater Basins.....	5-8
5.3.1	Yarmouk Basin	5-8
5.3.2	Amman – Zarqa Basin.....	5-11
5.3.3	Side Wadis	5-12
5.3.4	Azraq Basin.....	5-13

5.3.5	Hammad Basin	5-14
5.3.6	The Jordan Valley Basin.....	5-16
5.4	Existing NGWA Sources of Water Supply	5-17
5.4.1	Governmental Wells Connected to Existing Transmission Lines	5-17
5.4.2	Eastern Transmission System (Al-Aqeb and Al-Zatary Wells)	5-21
5.4.3	Governmental Wells Serving the Local Population.....	5-24
5.4.4	Governmental Springs Serving the Local Population	5-24
5.5	Current Water Uses and Water Balance	5-25
5.5.1	Governmental Wells and Spring Usage.....	5-25
5.5.2	Private Well Usage.....	5-26
5.5.3	Existing Rate of Groundwater Depletion	5-27
5.6	Potential Additional Sources of Water.....	5-28
5.7	Re-Allocation of Existing Water Sources	5-28
5.8	Control of Irrigation Usage.....	5-32
5.8.1	Reduction of Water Demand for Irrigation.....	5-32
5.8.2	Control over Illegal Use of Water	5-33
5.9	New Sources of Water Supply	5-33
5.9.1	Transfer of Private Domestic and Irrigation Wells	5-33
5.9.2	Development of New Major Springs	5-34
5.10	Source Water Quality and Treatment	5-38
5.10.1	Tabaqat Fahel Wells and Spring	5-39
5.10.2	Manshyeh Wells	5-40
5.10.3	Wadi Al-Arab Wells	5-41
5.10.4	Zatary Wells.....	5-42
5.10.5	Aqeb Wells	5-43
5.10.6	Mukheiba Wells	5-43
5.10.7	King Abdullah Canal WTP Intake Site	5-43
5.10.8	Al-Wehdeh Dam (Yarmouk River).....	5-45
5.11	Proposed Water Sources	5-47
	Annex 1 Private Wells Located Near Existing NGWA Transmission Lines	5-50
6	PLANNING AND DESIGN CRITERIA.....	6-1
6.1	General	6-1
6.2	Design for Continuous Supply	6-1
6.3	Design for Intermittent Supply	6-3
6.4	Water Treatment Requirements.....	6-3
6.5	Pump Stations.....	6-4
6.6	Pipelines	6-4
6.7	Unit Costs.....	6-4
6.7.1	Ductile Iron Pipelines Unit Costs.....	6-5
6.7.2	Reservoirs Unit Costs	6-7
6.7.3	Pump Stations Unit Costs	6-8
6.8	Basis for Economic Cost Comparisons	6-10
6.9	Capacities and Reliability of Wells and Springs.....	6-10
6.10	Economical Velocities in Force Mains.....	6-17
7	ALTERNATIVE TRANSMISSION SYSTEMS.....	7-1
7.1	General	7-1
7.2	Development of the Three Alternative Systems for Year 2030.....	7-1
7.2.1	General Methodology.....	7-1
7.2.2	General Guidelines for the Three Alternatives.....	7-2
7.3	Transmission Alternative 1.....	7-2

7.3.1	Guidelines	7-2
7.3.2	Description.....	7-3
7.4	Transmission Alternative 2.....	7-22
7.4.1	Guidelines	7-22
7.4.2	Description.....	7-22
7.5	Transmission Alternative 3.....	7-38
7.5.1	Guidelines	7-38
7.5.2	Description.....	7-38
7.6	Comparison of Alternative Transmission Systems	7-54
7.7	Conclusion	7-54
8	DESCRIPTION OF PROPOSED PROJECTS.....	8-1
8.1	General	8-1
8.2	Description of The Proposed System	8-1
8.2.1	General	8-1
8.2.2	East Transmission	8-1
8.2.3	West Transmission.....	8-11
8.2.4	Potential Emergency Connections.....	8-20
8.3	Phased Development of the Transmission System	8-23
8.3.1	Sources to be Developed.....	8-23
8.3.2	Selection of Water Transmission Projects.....	8-23
8.4	Rehabilitation of Existing Transmission Facilities	8-27
8.5	Centralized Monitoring and Control System.....	8-27
8.6	Proposed Sequence in Project Development.....	8-28
8.7	Financial Analysis	8-32

Appendices

- A. Rehabilitation of Pump Stations, Wells, and Pipelines: Mechanical Systems
- B. Rehabilitation of Pump Stations and Wells: Electrical Systems and Monitoring and Control Systems
- C. Legal Basis for Water Reallocations
- D. Tabaqat Fahel Water Quality Data
- E. Economical Velocities in Force Mains
- F. Energy Management Considerations
- G. KAC and Wehdeh Water Treatment Plants
- H. Centralized Monitoring and Control System
- I. Estimated Costs, Alternative Transmission Systems
- J. Estimated Costs, Proposed Projects
- K. Development of 30 MCM from Wehdeh Dam
- L. Financial Analysis
- M. Reservoirs Locations

LIST OF TABLES

Table 1-1	Statistical Summary of Northern Governorates Water Supply, 2003	1-6
Table 1-2	Summary of Rainfall Records in the Northern Governorates	1-7
Table 3-1	Internal Water Production, Imports and Exports, 2003.....	3-3
Table 3-2	Pipe Length (m) by Diameter and Material, Distribution System.....	3-9
Table 3-3	Pipe Length (m) by ROU, Pipe Material, and Diameter.....	3-10
Table 3-4	Pipe Length (m) by Diameter and Material, NGWA System	3-11
Table 3-5	Pipe Length by ROU and Pipe Diameter.....	3-12
Table 3-6	Number of Flow Monitoring Meters by Function.....	3-13
Table 3-7	Inventory of NGWA Facilities	3-13
Table 3-8	Number of Valves by ROU.....	3-14
Table 3-9	Number of Customers and Quarterly Consumption by ROU	3-15
Table 4-1	Forecast of Demographic Indicators for Jordan, 2005-2030	4-2
Table 4-2	Comparison of Population Forecasts for the NGWA Service Area.....	4-4
Table 4-3	Components of NGWA Water Demand Forecast, 2005-2030	4-6
Table 4-4	Summary of Water Forecast, NGWA Service Area	4-7
Table 4-5	Wastewater Forecast.....	4-8
Table 4-6	Existing and Planned Wastewater Treatment Plants.....	4-9
Table 5-1	Lithological and Aquifer Characteristics for the Central And Northern Parts of Jordan.....	5-3
Table 5-2	Groundwater Abstraction from the Yarmouk Basin, 1998-2002	5-11
Table 5-3	Groundwater Abstraction from the Amman-Zarqa Basin, 1998-2002.....	5-12
Table 5-4	Groundwater Abstraction from Side Wadis, 1998-2002	5-13
Table 5-5	Groundwater Abstraction from the Azraq Basin, 1998-2002.....	5-14
Table 5-6	Groundwater Abstraction from the Hammad Basin, 1998-2002	5-15
Table 5-7	Groundwater Abstraction from the Jordan Valley Basin, 1998-2002.....	5-17
Table 5-8	Wadi Al-Arab Well Field and Aquifer Information.....	5-18
Table 5-9	Tabaqat Fahel Well Field and Aquifer Information.....	5-20
Table 5-10	Al-Manshyeh and Juhfiyya Wells and Aquifer Information.....	5-21
Table 5-11	Al-Aqeb Well Field Information	5-22
Table 5-12	Al-Zatary Well Field Information.....	5-23
Table 5-13	Isolated Well Information.....	5-23
Table 5-14	Information on Local Governmental Wells.....	5-24
Table 5-15	Domestic Water Demand Springs	5-25
Table 5-16	NGWA 2003 Water Supply Budget for Governmental Wells	5-26
Table 5-17	Private Wells by Groundwater Basin, 2002.....	5-27
Table 5-18	Over-abstraction and Water Level Changes in Selected Monitoring Wells	5-27
Table 5-19	Mukheiba Well Field and Aquifer Information.....	5-31
Table 5-20	Mukheiba Well Field Abstractions, 1995-2003.....	5-31
Table 5-21	Potential Water Supply Springs.....	5-34
Table 5-22	Summary on Water Quality of Water Sources.....	5-38
Table 5-23	Tabaqat Fahel Water Quality Summary	5-39
Table 5-24	Manshyeh Wells Water Quality Summary	5-40
Table 5-25	Wadi Al-Arab Wells Water Quality Summary	5-41
